Relief Felt Chair by Ben Mickus

"Most chairs are upholstered in foam, which can be treated with fire retardants and difficult to recycle. Ben Mickus designed the Relief Chair as part of a collection that uses "digital fabrication and solid, rapidly renewable materials. Upholstery, foam products and finishes are all supplanted with thick sheets of natural wool felt, adhered with non-toxic, water-based adhesives. The precision-cut contours of each piece of felt are aggregated into sinuous yet comfortable forms."

The designer continues:

The chair is a sculpted assembly of rapidly-renewable felt sheets, supplanting foams, upholstery and anything applied. The cascading edges of the felt sheets create an integral pattern with both a visual and tactile effect."
