Felt Chair Looks Funky (Good), Feels Funky (Bad)

By Mark Wilson, 6:30 PM on Fri Mar 6 2009, 5,246 views

This chair only appears to have mobile, interlocking plates capable of structural minimization and stylistic transformation. But your ass doesn't need to know.

Sure, the Relief Chair only looks gadgety, but it's causing somewhat of a splash in the crazy world of textiles. By designer Ben Mickus, the chair is an artistic exploration of what can be done with felt. It might not be comfortable, and it's certainly not affordable. But the temporary, geometrical skin indentations it will leave

down your spine will look totally wicked. [[Mickus Projects](#) via [Core77](#)]
