••: 1

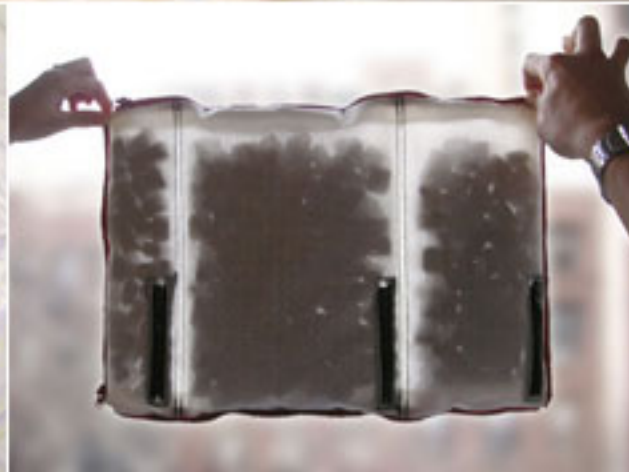

Designer Ben Mickus' cool-looking [Relief Chair](#) makes its world debut today at the Cooper-Hewitt, as part of the "Fashioning Felt" exhibition.

The chair is a sculpted assembly of rapidly-renewable felt sheets, supplanting foams, upholstery and anything applied. The cascading edges of the felt sheets create an integral pattern with both a visual and tactile effect.

The scraps of felt generated during fabrication are reused in other Mickus Projects pieces, such as the [Refill Pillow](#) (photos below).
